

Rate LRET1 – Line Retention Rate for Idle Services
Effective date – February 1, 2023

Applicability

This rate is available for Members who wish to retain an idle service. Idle services are instances of facilities where electric power is available, but not being utilized. In the event that Enerstar identifies a service that would normally be retired due to age or maintenance issues, the Member may choose to keep that service in place by paying the line retention rate to help cover the expense related to the installed equipment as long as maintaining that equipment does not put an undue burden on the Cooperative.

Type of Service

Idle.

Monthly rate

Grid Access Fee:	\$41.50
------------------	---------

Other Charges

There is no KWH energy, Power Cost Adjustment (PCA), Distribution Cost Adjustment (DCA), minimums, or taxes on this type of service.

Terms of Payment

The above charges are net, the gross charges being five percent higher. Gross charges shall apply after net due date. In the event gross charges are not paid by cut-off date assigned each month, service is subject to disconnection without further notice.
